

CORE PACKAGE

For organisations that need a strong cybersecurity baseline

Cyber attacks on UK SMEs have risen by 42% in the last three years alone. So, there's a clear need for a comprehensive cybersecurity solution, dedicated to small businesses.

Introducing CyberSmart Core - an all-in-one package designed to provide SMEs with end-to-end assurance against digital threats. With Core, you can access everything your business needs to strengthen your security posture, ensure compliance, and access a cost-effective route to cyber insurance.

WHAT'S INCLUDED?

CyberSmart Active Protect

Protect your organisation around the clock with 24/7 vulnerability scanning, cybersecurity awareness training, and IT policy management (available for both mobile and desktop).

- Device monitoring and risk management
- CyberSmart Learn Lite - bitesized security awareness training
- Smart Policies - policy templates, distribution and agreement
- Mobile security checks
- Privacy-first approach for BYOD environments
- User management interface with deployment options and compliance reports
- Multi-level reporting across company, users and devices

Cyber Essentials certification

Protection from 98.5% of the most common cyber threats, delivered faster than anywhere else with unlimited free submissions and live support.

- 1 x Cyber Essentials certificate can be achieved in any 12 month period
- Achieve the fastest certification on the market, in as little as 24 hours
- Unlimited submissions at no extra cost
- Access unlimited support from the UK's most experienced Cyber Essentials experts

PLUS...

£100k cyber insurance

Designed to help you with robust coverage in the event of cyber attack. Free when you complete Cyber Essentials.

- 24/7/365 AIG response service
- Security and privacy liability
- Cyber extortion
- Network interruption
- 48 hour free AIG First Response Service
- Limit: GBP 100,000 aggregate

UPGRADE YOUR PACKAGE

Enhance your protection by upgrading to our Complete package or select an add-on to complement the Core package.

CyberSmart Complete combines certification with proactive monitoring and advanced data protection to create our most comprehensive security package yet. This includes everything available to you in Core as well as Cyber Essentials Plus certification, Privacy Toolbox, and insurance increased up to £250,000.

CyberSmart Learn is a comprehensive and fully customisable security awareness training platform, including phishing simulations and real time reporting, for organisations of all sizes.

CyberSmart Vulnerability Manager (CSVM) is an advanced vulnerability management tool, backed by the UK's leading auditors. With monitoring, detection and remediation, CSVM makes managing and eliminating vulnerabilities simple.

CyberSmart Patch gives you a smarter way to stay secure. It delivers simple, effective patch management for Windows, macOS, and 350+ third-party applications—managed all from within the CyberSmart platform.

Custom Plan: alternatively you can purchase any combination of these products in a custom package tailored to your specific business needs.
